Dear Web Designers & Web Developers,

Imagine, a client of you asking for a website which carries easily **hundreds or up to thousands of physical products items**. You will go haywire just trying to create all the static product pages, not to mention the hassle of maintaining such a website after the delivery. It's just not possible to do the work right and profitably.

Well, your worst nightmare is over, with our line of webShaper e-commerce and e-catalog software solution, you can now easily build an e-commerce or e-catalog website which easily support thousands of products. Best part is, the SEO built-in will help your clients to properly indexed and **GET FOUND** by the Big 3 - Google, Yahoo and MSN.

E-catalog and e-commerce functionality is already becoming an important aspect of commercial web design. Majority of businesses today have a static website, but only a minor percentage of them allow their customers to place order and pay via credit card online. We foresee more and more opportunities for designing new e-commerce websites which will **become your major source of revenue**.

Furthermore, webShaper comes with an innovative **XSLT-Driven CSS Template System**, which let you integrate your tailored-made design to the e-commerce or e-catalog system without the need to mess with a single line of programming code. All you need is just HTML and CSS, and the whole modification can be done within an AJAX editor inside webShaper control panel, you don't even need to use FTP to transfer the template or CSS file back and forth.

Why wait? Join us as Web Design Partner (WDP) and start providing your customers with easy-to-use, high quality e-commerce and e-catalog application at a cost they can always afford while you stand to **PROFIT MORE**.
